

Gohashininclude Tasks for Interns					
Name	Description	Reference	Time		
Django Girls	Need to create complete blog app	https://tutorial.djangoirls.org/en/	1 Day		
Django Polls	. Need to merge Django Girls and Django Polls both project in a new project. Then follow following steps: 1. Create Abstract User. 2. Create Signup, Login, Profile View and Profile Edit for User. 3. Create Category for Post(One to Many Relation). 4. Create Tags for Post(Many to Many Relation). 5. Create Comment and Reply for Post. 6. Create Featured and Thumbnail image option for Post. 7. Create Author option for Post using Abstract User. 8. Use slug instead of ID for detail page(including Post, Category, Tag, etc). Slug must be AutoSlugField only. 9. Apply Filters for Post. They are following: a. Category wise filter. b. Tag wise filter. c. Author wise filter. d. Date wise filter. 10. Admin customization: a. admin can export CSV file of all tables. b. Search filter in all table listing by all fields. c. Autocomplete and Horizontal search in all FK Fields. d. Horizontal search in all M2M fields. e. Filter option in all tables. 11. Notify all registered users via email, whenever new Post created using MultiThreading Only . Things to be noted in mind everytime: 1. Code must be upto date on Github. 2. UI must remain as Django Girls project's default UI. 3. Code should be clean and in well managed file structured.	https://docs.djangoproject.com/en/4.1/intro/tutorial01/	1 Day		
Django Merge	Deploy your merged project on your local machine. 1. Install Apache2 on your Machine. 2. Configure /etc/apache2/sites-available/your site file with your IP, project path, env path, Author, and wsgi. 3. Listen it on 80 port. 4. Your project must run on all machines available in your network on your IP address with 80 port.	N/A	5 Days		
Deployment	Clone a webpage using reference page. 1. Design should be as it is in https://planmycareers.com/ 2. Use Bootstrap only for design purpose, if you want to use custom CSS, then ask your respective Senior for this	https://www.digitalocean.com/community/tutorials/how-to-serve-django-applications-with-apache-and-mod-wsgi-on-ubuntu-18-04-lts	2 hours		
UI Design		https://planmycareers.com/	2 days		
jQuery	Discuss properly with your senior before start	N/A	1 week		
*Thing to be in mind every time even its Task for learning or Live project. 1. Code should be up-to-date on GitHub or Gitlab. 2. You should have well designed document for project's Architecture. 3. Don't waste time more than 10 min, whenever you stuck in any problem(Ask to your senior).
